

Today we would like to determine how to minimize the CO2 emissions of our vehicles. We begin by first examining the characteristics of different fuel types and then go on to examine different vehicles.

"Fuel Type" - The fuel type: X = Regular gasoline, Z = Premium gasoline, D = Diesel, E = Ethanol (E85), N = natural gas...

CO2 Emissions by Fuel Type
(Ethanol Wins!)

Average CO2 Emissions by Vehicle Type

Distribution of Fuel Types per Vehicle Class
